In mathematics education, ethnomathematics is the study of the relationship between mathematics and culture. Often associated with "cultures without written expression", it may also be defined as "the mathematics which is practised among identifiable cultural groups". It refers to a broad cluster of ideas ranging from distinct numerical and

Linking Mathematics Culture and Community ScienceDirect

This paper presents the importance of linking mathematics, culture and community and ways of doing so that take into consideration the cultural diversity of the students in order to develop learning activities. Mathematical concepts based on cultural perspectives allow students to not only reflect and appreciate their own culture but also the culture and traditions of others. The involvement

Metaphysics Mathematics and Meaning Philosophical

Of particular relevance is the question of whether the deductive basis of human mathematics is decidable. PART V This part includes discussion of a host of issues regarding reference and semantic content. In On Content I argue that Frege might be properly interpreted as having employed a notion of logical content more ne-grained than his notion of Bedeutung (extension) yet more
