This book covers several research fields, all of which deal with transport. Three main topics are  
treated: road traffic, granular matter, and biological transport. Different points of view, i.e. modelling,  
simulations, experiments, and phenomenological observations, are considered. Sub-topics

No doubt the hot topics addressed in granular matter research have diverged from those in traffic  
since the days when the obvious analogies between traffic jams on highways and dissipative  
clustering in granular flow intrigued both c- munities alike. However, now just this diversity became a  
stimulating feature of the conference. Many of
